EXPERIENCE

Front-end devleoper, Twill by Maersk

Sep 2019

Twill (by Maersk) is a logistics service for small and medium-sized businesses. Shipping cargo door-to-door, over land and sea. As a frontend developer, I'm responsible for coding the main application (React, Redux, styled-components) and also some apps for internal use.

Achievements:

- Established localization process (using Weblate TMS)
 - Moved legacy WordPress company website to Contentful CMS with Gatsby.js frontend
-

Front-end devleoper, SEMrush

Aug 2018 – Aug 2019

SEMrush is a tool for gathering insights into content marketing, competitor research, PPC and social media marketing

Achievements:

- Development of the new UI of semrush.com (SEMrush Affiliate Program) React + Redux
 - Created interactive webpages
 - Actively participated in team hiring
-

Front-end devleoper, Wrike

Apr 2014 – Aug 2018

Wrike is a project management software, with headquarters in San Jose, CA.

Achievements:

- Created a WYSIWYG email editor, which integrates with Marketo (CRM) and CrowdIn (Translation Management System).
 - Interactive components for web pages
 - Multiple web apps for internal use
 - HTML layouts for emails (gulp, jade, css, inlinecss) for Marketo and operational emails.
 - wrike.com website development.
-

Web devleoper, Veeam Software

Nov 2011 – Apr 2014

Achievements:

- Created layouts for numerous Landing pages and emails.
- Created web applications for internal needs
- WYSIWYG newsletter emails editor (javascript \leftrightarrow json \rightarrow PHP+MySQL).
- Several email automation apps (JS, PHP, cURL).

EDUCATION

St Petersburg State University of IT, Mechanics and Optics

– Aug 2015

Master's degree in IT Design
