+31 6 29361596
The Hague, NL

SKILLS

ES6 Typescript React Redux Contentful Gatsby.js

Node.js MongoDB SQL Docker Git AWS
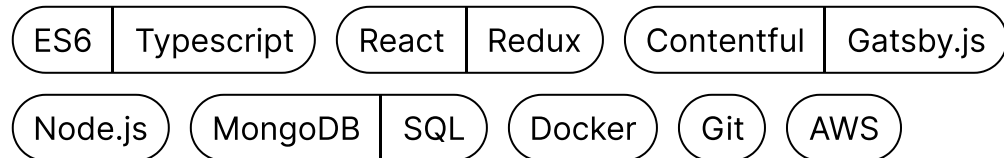

EXPERIENCE

Front-end developer, Twill by Maersk

Sep 2019

Twill (by Maersk) is a logistics service for small and medium-sized businesses. Shipping cargo door-to-door, over land and sea. I'm responsible for coding the main application (React, Redux, styled-components) and also some apps for internal use.

Achievements:

- Established localization process (using Weblate TMS)
- Moved legacy WordPress company website to Contentful CMS with Gatsby.js frontend

Front-end developer, SEMrush

Aug 2018 – Aug 2019

SEMrush is a tool for gathering insights into content marketing, competitor research, PPC and social media marketing

Achievements:

- Development of the new UI of berush.com (SEMrush Affiliate Program) React + Redux
- Created interactive wepabges
- Actively participated in team hiring

Front-end developer, Wrike

Apr 2014 – Aug 2018

Wrike is a project management software, with headquarters in San Jose, CA. I worked as a developer for Marketing Operations team.

Achievements:

- Created a WYSIWYG email editor, which integrates with Marketo (CRM) and Crowdin (Translation Management System).
- Interactive components for web pages
- Multiple web apps for internal use
- HTML layouts for emails (gulp, jade, css, inlinecss) for Marketo and operational emails.
- wrike.com website development.

Web developer, Veeam Software

Nov 2011 – Apr 2014

Veeam is a backup and data management platform for Cloud, Virtual and Physical machines. I worked as a web developer for EMEA marketing team.

Achievements:

- Created layouts for numerous Landing pages and emails.
- Created web applications for internal needs
- WYSIWYG newsletter emails editor (javascript ←json→ PHP+MySQL).
- Several email automation apps (JS, PHP, cURL).

EDUCATION

St Petersburg State University of IT, Mechanics and Optics

– Aug 2015

Master's degree in IT Design
